EDUCATION

VELLORE INSTITUTE OF TECHNOLOGY

Bachelor of Computer Science and Engineering (CGPA: 9.08)

VELLORE, INDIA

July 2022 – July 2026

R.N. PODAR SCHOOL

Physics, Chemistry, Math, Computer Science (Class 12: 92%)

MUMBAI, INDIA

April 2018 – April 2022

WORK EXPERIENCE

SAMSUNG PRISM R&D Intern

R&D Intern

REMOTE

July 2025 – Present

- Working on an algorithm to analyse signal strength and patterns from multiple devices to estimate user location.

REVVITY HEALTHCARE | Biotech

THANE

Data Analyst Intern

May 2025 – July 2025

- Utilize **Python** and **Power BI** to analyze and visualize large datasets. Independently developed a comprehensive audit logging report.
- Wrote various scripts to test user-defined functions (UDFs) for **data pipelines** and contributed to the design and logic of an **e-commerce recommendation engine**.

VOXVERTEX

REMOTE

Backend Developer

June 2024 – August 2024

- Engineered core backend for a mobile app using **Go (Gin)**, **PostgreSQL**, and **Docker**.
- Integrated features like **Google Calendar sync**, payments, **OAuth 2.0**, and instant messaging.

GOVGPT (Trademarkia)

REMOTE

Backend Developer Intern

January 2024 – May 2024

- Developed the backend of a law enforcement application using **Flask** and **GoLang**, using **Timescale DB** as the database and **OAuth2.0** for user authentication.
- Converted **GraphQL** database logic from **NodeJS** to **GoLang** for improved performance.
- Maintained and optimized legacy **NodeJS** codebase; upgraded spam and profanity filters.

ORGANISATIONS

SOCIETY FOR INDUSTRIAL AND APPLIED MATHEMATICS (SIAM), VIT

VELLORE, INDIA

Technical Head

September 2023 – Present

- Led tech operations, including code reviews and sessions on GitHub and Competitive Coding.
- Built full-stack portals for flagship events ([Math Premier League](#), [Coding Relay](#)) with 100+ concurrent users

CODECHEF - VIT STUDENT CHAPTER

VELLORE, INDIA

Core Committee Member

March 2023 – Present

- Developed backend for DevSoC 24' (500+ users) using GoLang, Redis, PostgreSQL ([GitHub](#)).
- Created backend for CookOff 8.0 using ExpressJS and Judge0 API (200+ users) ([GitHub](#)).

PROJECTS

Golang File Setup Extension ([Link](#)) ([GitHub](#))

- VSCode Extension** that initialises basic files and folder structure for Go frameworks (Gin/Echo/Fiber/Chi), including main.go, Docker files, and optional SQLx setup.

VTOP to Google Calendar Extension ([GitHub](#))

- Google Extension to automatically sync due dates of all Digital Assignments from VTOP to Google Calendar.

gRPC-Game ([GitHub](#))

- Multiplayer quiz game using gRPC to stream responses from users and update the leaderboard with their points.

ACHIEVEMENTS AND SKILLS

Achievements: JPMC Good For Good 2025 Winner

Languages: GoLang, Javascript, Python, NodeJS, MongoDB, SQL, GraphQL, C++, C, R, Java, HTML, CSS

Frameworks: Gin, Echo, GoFiber, Chi, ExpressJS, Django, Flask, ReactJS, NextJS, Pandas, Numpy

Tools: AWS (S3, EC2, ECS), Docker, JWT, OAuth 2.0, gRPC, NGINX, Power BI, Databricks

Certificates: [AWS Cloud Practitioner](#), [The Complete Full Stack Web Development Bootcamp](#), [Supervised Machine Learning: Regression and Classification](#), [LCM Grade 7 - London College of Music Examinations](#)
